

Salesforce Developer - Job Description

Overview

Veltique Software is looking for a Salesforce Developer to design, develop, and maintain scalable Salesforce solutions.

Job Details

Position: Salesforce Developer

Location: Ahmedabad

Employment Type: Full Time

Experience: 2–4 Years

Key Responsibilities

- Develop and customize Salesforce applications.
- Create Apex Classes, Triggers, Flows, and Lightning Components.
- Configure Salesforce objects and fields.
- Support integrations and deployment processes.
- Maintain technical documentation.
- Assist with platform improvements.

Required Skills

- Experience with Apex and Lightning Web Components.
- Knowledge of Salesforce Flow Builder and automation.
- Understanding of Salesforce security concepts.
- Familiarity with SOQL and Salesforce data models.
- Good analytical and problem-solving abilities.

Educational Qualifications

- Bachelor's Degree in Computer Science, Information Technology, Computer Engineering, or a related field.
- Master's Degree (MCA/M.Tech) is an added advantage.
- Strong understanding of software development principles and cloud technologies.

What We Offer

- Flexible work environment.
- Opportunity to work on enterprise-level Salesforce projects.
- Continuous learning and professional development opportunities.
- Exposure to modern Salesforce technologies and solutions.
- Career growth within a senior-led consulting organization.
- Collaborative and innovation-driven work culture.

Why Join Veltique?
